

In the chapter on Second Prescription the author has explained the classical way to analyse symptoms. This title features: Kents Prognostic Observations as applied to LM Scale and an overview about the way Hahnemann prescribed during his last years, according to the letter of Dr Crose Boenninghausen. The pros and cons of dried prescription of LM Scale are analysed. A whole chapter is written on aspects to be elected in order to prescribe the scale of a medicine. Two chapters are destined to analyse the point of doses and why Hahnemann diluted the medicines and how to increase as well as diminish doses. There is a chapter to explain whether an aggravation with LM potency is due to high potency, high dose or to a badly chosen medicine.
