

Becoming wealthy is a dream for many of us, but most of us don't aspire to have Bill Gates' business empire or the Trump billions. Most of us just want to be free from money worries and are looking for that break-through in business or in our investments - to set us on the course to achieve financial freedom. So what, if like most people, your aspirations are modest - if just a million or two is all you really want? What if you weren't born with a silver spoon in your mouth and don't have a lot of money to start with? How can you get from where you are now to where you want to be, without working yourself into an early grave or compromising the things that are important to you? The answers lie in those who have made it. You will learn from this book the key principles that everyday people have used, and you can apply to your own life:- what it takes to become a multi-millionaire - how to unlock your potential for success - what needs to change about your thinking - how to become wealthier - in the wider sense of the word.
